Bilateral Meetings

- Wednesday 12:00 - 14:00

Description

Croatian Competitiveness Cluster for FPS represents a networking and cooperation platform for different business subjects aiming to improve food processing sector competitiveness in the Republic of Croatia. Cluster inaugural assembly was held in January 2013 in Zagreb, comprised of recognised business subjects and public, private and business institutions, scientific and research community stakeholders and professional and business associations.

The goal of networking of various interested stakeholders during the implementation of different projects is to contribute to the enhancement of competitiveness of business subjects, increase the employment and competitiveness of food-processing sector, develop equal regional development and sustainable development and wellbeing of the society.

The cluster represents vast potential for cooperation, growth and development of individual subjects as well as the whole community. Therefore, from a community viewpoint, a cluster is a form of socially responsible engagement, handling resources to create new values not only for individual subjects, but also for the wellbeing of the whole community. Furthermore, examples of clusters active in various sectors in other countries, despite challenging economic periods and turbulent environment, testify in favour of successfulness of such a cooperation model between different social subjects, operating to enhance competitiveness and sustainable development of the community.

THE OVERALL GOAL

The overall goal, set within the Food Processing Sector is to contribute to the fulfillment of the vision and to promote the economic growth and competitiveness within the Food Processing Sector through research, technological development and the implementation of innovation and new technology, as well as to increase the inflow of investment.

The aforementioned goal is going to be achieved within the 4 priority areas, which are as follows:

FOR THE 4 PRIORITY AREAS:

Improving the business environment and strengthening of the competitiveness of the Food Processing Sector.

The Improving and diversifying of the production through research, technological development, and the implementation of innovation and KET Technologies.

Developing business infrastructure and business support institutions for the Food Processing Sector. Reducing cost and increasing productivity within the sector by means of the implementation of new technology.
