Bilateral Meetings

- Wednesday 12:00 - 14:00
- Wednesday 15:00 - 17:00

Description

Energoglobal has become a recognizable brand in the field of generator power supply both in the domestic market and in the region. In 2018 we continued the trend of growth in production and turnover from previous years. By increasing the number of employees, production and warehouse capacities, as well as the stock of materials, we allow our partners shorter delivery times, faster response to possible interventions, as well as the implementation of more complex projects and solutions. Cooperation with the most famous manufacturers of components and equipment is in the constant growth, which enables us to offer our partners premium quality and maximum reliability at prices adjusted to the market. In our products, you find the components of the world's most famous brands: engines: Volvo Penta, Perkins, FPT Iveco, Scania, Daewoo generators: Linz Electric, Sincro, Leroy Somer, Marelli, Mecc Alte gen-set controllers: ComAp, Deif, Deep Sea PLC, Datakom switch gear: ABB, Socomec, Noark, Eaton In addition to the production and delivery of new generator sets, we can offer regular and corrective maintenance of your existing generator stations, as well as modernization, automation and remote control. In addition, we also have UPS devices in order to provide end users with a complete backup system without interruptions in supply.
