Bilateral Meetings

- Wednesday 12:00 - 14:00
- Wednesday 15:00 - 17:00

Description

ENECA is a local non-governmental organization based in Nis, registered and operational since 2005. Our mission is sustainable local development in the Southeast Europe (SEE). It is our goal to continuously and consistently follow and meet our clients' and partners' needs providing the environment, which would improve their business, knowledge, skills and abilities. We are completely dedicated to socially responsible business activities taking care of human needs and preserving natural resources. Since its foundation, ENECA has been active in the field of socio-economic development directly assisting over 2000 small businesses with the equipment, business and vocational trainings, direct monitoring and counseling. Through a range of projects which ENECA has implemented either individually or in cooperation with local and international partners, we have managed to stay focused on resolving the critical socio-economic issues present in the south of the country. We have also maintained the continuity in our work by ongoing improvement of the knowledge we have acquired as well as by monitoring the socio-economic situation in Serbia. Through supporting the establishment and development of small family businesses, ENECA has enabled employment and new jobs creation in towns and municipalities in which the projects have been implemented. Employing is always followed by additional education through business and vocational trainings, local community support and often business sector support, which results in the best outcomes and long-term sustainability.

Offer & Request

Offering - Technical cooperation, sales and distribution. Requesting - investment/ financing

The projects, implemented by ENECA, are based on the sustainable development concept, taking care of the national and local strategies as well as the international standards. Moreover, not only have we been trying to follow new mechanisms and trends but we also anticipate and create them.

One of the last implemented projects is furnishing and opening food production center in region of Southeastern Serbia "Good food factory".

The food production center "Good food factory" is fully equipped with necessary equipment for food processing. It includes all kinds of machinery and tools for producing traditional food, beverages (juices) and their packing.

The center have one food technologist that will help and guide entrepreneurs to produce new and improved products and optimize their production cycle.

Beneficiaries were provided with seminars on how to develop their unique brand and other.

We want to offer quality and traditional products to our domestic and foreign markets, but also we are looking for investment opportunities for the development and improvement of the center.
